

## Ongoing Groups in Systems-Centered Training in the Netherlands in 2019

The board of the Stichting SCT Nederland (SCT-NL) is pleased to announce that the Ongoing Groups led by Susan Gantt, Mike Maher and Ray Haddock will continue to run in 2019. The three groups run parallel to each other and come together for a Large Group meeting at the end of each training day.

SCT is based on 'The Theory of Living Human Systems', developed by Yvonne Agazarian. ([www.systemscentered.com](http://www.systemscentered.com)). In a SCT ongoing group, you learn to develop both personally and at group level. You will acquire skills for guiding yourself through different development phases, while gaining valuable insights into the group as a living human system with its own qualities, flaws and intrinsic wisdom.

The goal of an SCT training group is learning SCT. This is done by experiential training where one works as a member of a group applying SCT with one's self. Since its introduction to the Netherlands in 2010, a growing number of individuals have been integrating the principles of SCT into both their work and private lives. (<http://www.sct-nl.nl>). Official SCT curriculum training is available in the US, the UK, Sweden and the Netherlands.

The SCT Ongoing Training Groups take place in Wageningen and consist of three x 2 day workshops on location, extended with six 1 hour mini-workshops on SCT theory done via conference call.
